About Me

From the moment I produced “Hello World!” in the console of my first application, I knew I was hooked into the world of software development. But software development has never been “just a job” for me, it has offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple “Hello World!” has become a full-fledged passion that only gets more exciting as the years go by.

Below you’ll find projects I have completed that showcase my skills and general background in developing industrial applications. In the contact section is also a link directed to my personal portfolio.

Experience

Experienced in building simple and reusable web Applications, websites and games with Javascript and react JS. I have also demonstrated the ability to build application that I need promptly.

These projects include
QR Code Generator using Javascript.
Image to PDF converter.

Education

Redeemer’s University

Bachelor of Laws

Cumulative GPA: 4.72/5.0

Skills

HTML 5, CSS3, JavaScript, React, GIT, Figma.
